PROFESSIONAL SUMMARY

Entry-level full-stack developer with hands-on experience building real-world web, automation, and IoT systems. Skilled in PHP, JavaScript, and MySQL, with a focus on developing practical solutions that improve workflows and reduce manual processes. Experienced in delivering complete systems from concept to deployment, including client-based projects and production-ready applications. Highly adaptable, quick to learn new technologies, and comfortable working with both technical and non-technical users. Open to entry-level roles, internships, and opportunities to contribute to real-world development projects while continuing to grow technical expertise. Brings hands-on experience working with systems currently used in production environments.

PROJECT & FREELANCE EXPERIENCE

Full-Stack Developer (Project-based) | Yugobooth: Automated Photobooth System ***2025 – Present***

- Developed and deployed a fully automated photobooth system integrating hardware, software, and payment processing components
- Designed end-to-end user workflow (payment, layout selection, photo capture, filtering, printing, and QR download)
- Implemented bill acceptor system, eliminating manual payment handling
- Built an admin dashboard with real-time analytics for revenue tracking and session monitoring
- Improved operational efficiency by automating manual processes and reducing repetitive tasks
- Maintains and supports a live production system used in real business operations, including troubleshooting, updates, and performance improvements

Technologies: PHP, JavaScript, MySQL, Python, Arduino, FFmpeg

Full-Stack Developer (Project-based) | BBridge: Barangay Management & Public Service System ***2025***

- Designed and developed a web-based system for managing documents, scheduling, and public service requests
- Implemented role-based access control for secure multi-user access
- Integrated OCR (Tesseract) to automate receipt verification and reduce manual processing
- Developed a notification system to improve response time and enhance service tracking
- Integrated geolocation features for accurate reporting and mapping

Technologies: PHP, JavaScript, MySQL, Tailwind CSS, Tesseract OCR, OpenStreetMap API

IoT Developer (Capstone Project) | HydroTech: Smart IoT Water Dispenser ***2024 – 2025***

- Led development of an IoT-based automated water dispensing system
- Designed hardware architecture using Arduino and ESP8266
- Implemented QR-based authentication and automated dispensing logic
- Integrated hardware system with a web dashboard for real-time monitoring
- Performed testing, debugging, and system optimization

Technologies: PHP, JavaScript, MySQL, Arduino, ESP8266

WORK EXPERIENCE

Information Technology Intern | DepEd – Schools Division Office, Pampanga ***2025***

- Provided technical support to staff, resolving common IT issues
- Managed inventory tracking of ICT equipment
- Tested and verified newly delivered devices before distribution
- Created reports and documentation for office operations
- Developed Excel-based automation to improve data processing efficiency
- Encoded and maintained data for 500+ schools using Microsoft Excel
- Created video tutorials and user guides on account management processes, including Microsoft 2FA setup/removal and password reset procedures to assist staff and reduce repetitive support requests

Computer Shop Assistant / IT Support | Computer Shop – Guagua, Pampanga ***2014 – 2018***

- Assisted customers daily with computer usage, troubleshooting, and technical concerns
- Installed, configured, and updated software and operating systems
- Performed hardware maintenance, upgrades, and basic repairs
- Managed customer sessions, billing, and system monitoring
- Supported network setup and maintenance (LAN connections)

TECHNICAL SKILLS

Programming Languages: PHP, JavaScript (ES6+), Python, C++, SQL
Web Development: HTML5, CSS3, Tailwind CSS, Bootstrap, WordPress, React
Databases & APIs: MySQL, REST API Development
Tools & Platforms: Git, GitHub, VS Code, Trello, Jira, Microsoft 365, Postman
Hardware & IoT: Arduino, ESP8266
Other Tools: FFmpeg, Tesseract OCR

EDUCATION

Pampanga State University | Pampanga, Philippines ***2021 – 2025***
Bachelor of Science in Information Technology

CERTIFICATION

Civil Service Examination | Professional Level Passer **August 2025**
