

RONALD SORIANO

Software Engineer | Full-Stack Developer

Guagua, Pampanga | +639623863712 | ronaldsoriano2727@gmail.com

EDUCATION

Pampanga State University – Main Campus

BS in Information Technology

Bachelor, Pampanga

August 2025 | GWA: 1.43

EXPERIENCE

Technical Partner | Software Engineer

December 2025 - Present

Yugobooth – Angeles, Pampanga | Next.js, JavaScript, TypeScript, shadcn/ui, Python, C++, PHP, MySQL, HTML, CSS

- Solely designed, developed, deployed, and maintained multiple business-critical systems from scratch, including a **Photobooth Management System** and **Financial Management System** used in daily business operations.
- Developed a locally hosted **Photobooth Management System** using PHP, JavaScript, HTML, CSS, MySQL, Python, and Arduino, integrating kiosk operations, bill acceptor payments, photo capture, printing, QR code delivery, customer galleries, reporting, and administrative tools.
- Designed, developed, and deployed a Financial Management System** using Next.js, TypeScript, shadcn/ui, Supabase, and Vercel to manage sales tracking, expense management, budget allocations, bank ledger reconciliation, partner profit distribution, worker compensation, and financial reporting.
- Programmed **Arduino firmware**, assembled hardware wiring, and integrated peripherals—including bill acceptors, printers, cameras, and capture devices—into a complete production-ready solution.
- Designed relational databases and implemented business rules, authentication, audit logging, automated backups, and reporting features to improve system reliability and operational efficiency.
- Provided **remote technical support (AnyDesk)** and **on-site support**, diagnosing and resolving software, hardware, database, network, and peripheral issues to minimize operational downtime.
- Authored comprehensive **technical and operational documentation**, including operations manuals, Standard Operating Procedures (SOPs), startup and shutdown procedures, troubleshooting guides, incident response procedures, disaster recovery instructions, customer support workflows, and staff operating guidelines, enabling non-technical staff to independently operate and maintain the system.
- Trained staff** on system operation, troubleshooting procedures, and customer support workflows to ensure consistent daily operations.
- Continuously enhanced system features, optimized performance, and maintained production systems based on operational requirements and user feedback.

TECHNICAL SKILLS

Programming Languages: JavaScript | TypeScript | Python | PHP | SQL | HTML | CSS

Frameworks & Libraries: Next.js | React | Node.js | Express.js | shadcn/ui | Tailwind CSS | Bootstrap

Database & Backend: MySQL | PostgreSQL | Supabase

Cloud & Deployment: Vercel | Netlify | Render | Hostinger | Ngrok

Embedded & Integration: Arduino (C++) | FFmpeg

Developer Tools: Git | GitHub | Postman | VS Code | AnyDesk

Office Productivity: Microsoft Office (Word, Excel, Powerpoint) | Google Workspace (Docs, Sheets, Drive, Forms, Gmail)

Collaboration: Trello | Discord | MS Teams

CERTIFICATIONS & ELIGIBILITY

Career Service Professional Eligibility

August 2025 | Rating: 84.55%

Civil Service Commission (CSC), Republic of the Philippines

Computer Upskill Operations

July 2026 | Training: 120 hours

ELTECH Premier Training Center, Inc.
