PROFESSIONAL SUMMARY

Junior Software Engineer and Full-Stack Developer with hands-on experience building web applications, database-driven systems, automation workflows, and hardware-integrated solutions. Skilled in PHP, JavaScript, React, Node.js, MySQL, and REST API development, with real-world project experience supporting live business systems. Eager to contribute to a development team while continuing to grow as a software professional.

TECHNICAL SKILLS

Programming Languages:	PHP, JavaScript, Python, C++, SQL
Web Development:	HTML, CSS, Tailwind CSS, Bootstrap, React, Node.js, Express.js, WordPress / Elementor,
Databases & APIs:	MySQL, REST API Development, JSON, Webhooks
Tools & Platforms:	Git, GitHub, VS Code, Postman, Vercel, Render, Ngrok, Cloudflare Tunnel, Trello, Jira, Hostinger

PROJECT & FREELANCE EXPERIENCE

Full-Stack Developer (Project-based) Yugobooth: Automated Photobooth System	2025 – Present
- Developed, deployed, and maintained a full production photobooth kiosk system integrating web software, hardware controls, payment automation, photo processing, printing, and QR-based digital downloads - Built the complete customer flow from bill insertion and payment validation to layout selection, webcam capture, photo filtering, print processing, and softcopy download via expiring QR links - Integrated a TB74 bill acceptor with Arduino and Python serial communication to automate payment detection, balance updates, and session activation, reducing the need for manual payment handling - Created an admin dashboard for revenue tracking, session history, daily/monthly reports, audit adjustments, notifications, and social media consent management - Implemented image and video processing features including photo strip generation, filter application, FFmpeg timelapse conversion, and automated printer integration - Configured local kiosk deployment using XAMPP, MySQL, Python services, Chrome kiosk mode, Ngrok for temporary public QR download access - Trained booth staff on system operation, customer handling, troubleshooting steps, and daily startup/shutdown procedures - Provides ongoing technical support through remote calls and onsite assistance for a live business system used in real operations	
Technologies: PHP, JavaScript, MySQL, Python, Arduino, WebSockets, FFmpeg, XAMPP, Ngrok, HTML, CSS	
Full-Stack Developer (Personal Project) GaBayan AI: Legal Guidance Assistant	2026
- Developed and deployed an AI-powered legal guidance assistant for public attorney preparation - Built a modern responsive chat interface with real-time AI interactions and quick legal question prompts - Integrated Google Gemini AI with a Node.js and Express.js backend for secure AI request handling	

- Deployed frontend and backend services using Vercel and Render
- Implemented legal safety guidelines and disclaimer-based response structure

Technologies: React, Vite, Node.js, Express.js, JavaScript, CSS, REST API, Google Gemini AI, Vercel, Render

Full-Stack Developer (Personal Project) | MyJobTracker: Job Application Tracker System **2026**

- Built a full-stack job tracking system to organize applications, manage statuses (Applied, Accepted, Rejected, Archived), and store full job details
- Developed search, filtering, and a responsive dashboard to monitor application progress
- Created RESTful APIs with Node.js/Express and used Prisma ORM + Neon PostgreSQL for secure, scalable data management
- Deployed a modern React frontend using Vite for seamless user experience

Technologies: React, Vite, Node.js, Express.js, Prisma ORM, Neon PostgreSQL, JavaScript, REST API

Full-Stack Developer (Project-based) | BBridge: Barangay Management & Public Service System **2025**

- Designed and developed a web-based management system for document processing, scheduling, and public service requests with secure role-based access control.
- Integrated OCR, notifications, and geolocation features to automate verification processes, improve response tracking, and enhance operational efficiency

Technologies: PHP, JavaScript, MySQL, Tailwind CSS, Tesseract OCR, OpenStreetMap API, Hostinger

IoT Developer (Capstone Project) | HydroTech: Smart IoT Water Dispenser **2024 – 2025**

- Designed and developed an IoT-enabled water dispensing system using Arduino and ESP8266, featuring QR-based authentication and automated dispensing
- Integrated the hardware with a web dashboard for real-time monitoring, testing, debugging, and system optimization

Technologies: PHP, JavaScript, MySQL, Arduino, ESP8266, Hostinger

WORK EXPERIENCE

Information Technology Intern | DepEd – Schools Division Office, Pampanga **2025**

- Provided technical support, troubleshooting, and documentation for office operations, including user guides and video tutorials for Microsoft account management and 2FA processes
- Managed ICT asset inventory and maintained records for 500+ schools, while developing Excel-based automation tools to improve data processing efficiency.

Computer Shop Assistant / IT Support | Computer Shop – Guagua, Pampanga **2014 – 2018**

- Provided customer support for computer use, printing, troubleshooting, and technical issues
- Installed, configured, and maintained software, operating systems, and hardware; managed billing, customer sessions, and system monitoring

EDUCATION & CERTIFICATION

Pampanga State University | Pampanga, Philippines **2021 – 2025**

Bachelor of Science in Information Technology

Civil Service Examination – Professional Level Passer **October 2025**
